## MESTIERI TOSCANA CORPORATE STRUCTURE

Mestieri Toscana, **consortium of social cooperatives - social cooperative with a regional dimension**, is widely present, with planning activities and the provision of services, on the Tuscan territories of Firenze, Empoli-Valdarno, Lucca, Pistoia, Grosseto.

### Mestieri Toscana deals exclusively with:

- **Training:** accredited training agency to the Tuscany region
- **Active employment policies:** accredited body for job services providing

Mestieri Toscana is **part of a national network** of regional employment agencies authorized by the Ministry of Welfare and accredited by the respective regions (35 agencies in 7 regions).

## NT4EU - STRUCTURE

Training course type: ICT / Coding

Participants: 15 (refugees / asylum seekers)

Activities: ICT lessons for 80h\* in Lucca

Instruments: 15 PC; wide interactive whiteboard, wired classroom

Methodology: learning on field

Preliminary consideration:

Focusing on the potential of ICT in empowering job finding capacity is our first goal, as the digital transformation process has widely involved everyone lives as a matter of fact. But more interesting is focusing, in my opinion, on the conditions that may help this process, considering the target. We'll see something about it in the last one of these slides.

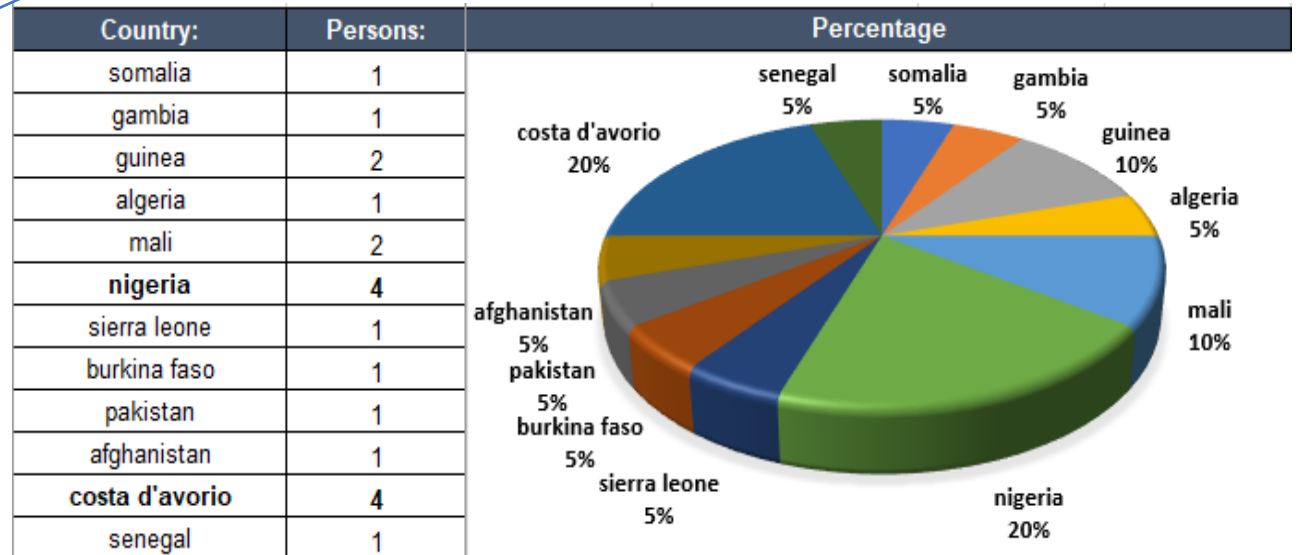

\*Due to covid19 emergency, we had lessons until the 4th of March, then we had to stop. Now we are considering some other opportunities to finish our lessons as we just had from Google the educational licence for virtual classrooms, but we must consider if this solution is suitable for our target). We did 52h and 28h still to do.

## SENDING NETWORK

## NT4EU PARTICIPANTS & COUNTRIES

Total Subscriptions: 20  
Actual participants: 14  
Involved Countries: 12

Critical Issues

**Three critical points that I suppose could be useful to highlight and share:**

- 1 - the problem of the linguistic level and of the bridging language used in teaching
- 2 - the physiological disparity of the digital entry levels
- 3 - the specific difficulty in the frequency stability due to sudden displacements in other reception centers / cities

Solutions

**We responded by putting in place:**

- 1 - a linguistic facilitator / cultural mediator
- 2 - a support of codocency and the stable presence of a tutor
- 3 - continuous communication with the network of entities that made a great job during the registration / subscription phase and therefore the quick response of a very solid project network
