Digitalisation is now a reality in all the fields of the economy and in all the phases of an enterprise lifecycle. ICT tools can highly benefit migrant entrepreneurs that decide to develop an enterprise in Europe.

In that context, how can ICT tools support migrant entrepreneurs?

You're warmly invited to join this online workshop! You'll get the opportunity to hear from two of the NT4EU project partners who founded their organisations. Two organisations supporting migrant entrepreneurs will also be presented by their founders.
